Advanced Ventilation Series

## CEILING MOUNT FAN/LIGHT COMBINATION

Quiet .5/1.0/1.5 Sone • Low Wattage • Long Life

New Condenser Motor

FDS13  
2 Lamps Included

# Panasonic®

Quiet Low Wattage  
Fan/Light Series

**FV-07VQL**

**FV-08VQL**

**FV-11VQL**

The WhisperLite Series is a new generation of ventilating fan and light fixtures that provide ultra quiet ventilation and warm color corrected lighting in an energy efficient fan/light combination. Panasonic's two 13 watt compact fluorescent lamps output over 1700 lumens (equivalent to two 60 watt incandescent bulbs).

Many fans in today's market are noisy and ineffective because people refuse to use them or use them only for a short period of time. Yet today's homes and apartments are built more tightly and need more ventilation to maintain a healthy indoor environment. Panasonic WhisperLite offers a solution to ventilation problems.

### WhisperLite models feature:

**QUIET:** WhisperLite models have a sound rating of 0.5, 1.0 and 1.5 sones. Reducing noise leads to longer run times resulting in better indoor air quality and reduced building maintenance from moisture damage.

**ENERGY EFFICIENT:** WhisperLite models are designed for low power consumption adopting Panasonic fluorescent lamps. Total fan/light combination is only 41.4 - 46.4 watts.

**LONG LIFE:** WhisperLite models are designed with new condenser fan motors that feature permanently lubricated metal bearings. This fan combined with Panasonic fluorescent lamps offers long life, convenience and comfort.

Other features:

- Easy installation
- Rust proof galvanized steel body
- Built-in damper to prevent back draft
- Thermal fuse protection
- Contemporary lighting grille design
- UL listed for tub/shower enclosure when used with GFCI branch circuit wiring
- 2 Panasonic 13 watt energy efficient lamps included
