## Identify your customer's high humidity issues with the Humidity Alert™ from Therma-Stor.™

The Humidity Alert™ was designed to discriminate between occasional periods of high humidity and the prolonged periods that create a risk of unhealthy biological activity. It's a simple, inexpensive device that monitors temperature and relative humidity conditions and records data that is known to contribute to wood rot, mold growth, musty odors and increased pest activity.

### Easy to use:

1. Place the meter in living space.
2. Collect the necessary humidity data.
3. Share humidity data with your customer.
4. Offer Ultra-Aire™ or Santa Fe™ Dehumidifiers as the solution.

**For more information on the Humidity Alert™ call 1-800-533-7533 or visit our website at [www.thermastor.com](http://www.thermastor.com). You can also link to our instructional movie on the importance of crawlspace dehumidification, and view the Ultra-Aire and Santa Fe product line.**
